Grover HQ

QR Stock & Inventory Management

Stick a QR on every product. Staff scan it on any phone, tap add or remove, and every change is logged with a name and a time. No app, no scanner hardware, no per-user fees.

1 The problem, in plain terms

Tracking what came in from a supplier and what went out in a sale often depends on manual counting and memory. This is a simple scan-based system so the owner and staff can update stock in seconds, from any phone, with a clear record of every change.

- Know what is in stock at any moment, without manual counts or guesswork
- Catch mismatched counts or shrinkage early: every change is tied to a name and a timestamp
- Faster than a written register: a scan and a tap, not an entry
- One system for owner and staff, with the right access for each role

2 How it works

1 Stick a QR on every product

Each product gets a QR sticker and a simple visible number (for example "Product #10") for quick reference. QR stickers are generated for up to 100 products.

2 Everyone gets their own login

The owner and each staff member get their own username and password. No email address and no app installation needed.

3 Scan and update

Open the site on any phone, log in and scan the sticker with the camera. During a bulk delivery, a "scan next" button lets staff go through several products back to back without leaving the page.

4 Add, remove or set the count

A simple screen shows the product. Tap to add stock (purchase), remove stock (sale) or set the count directly, for example to match a manual count you have already done.

5 Every change is logged

Each change is recorded with who made it, when, and the quantity. If counts are ever questioned, there is a full history to check.

6 Owner dashboard, simple staff view

The owner manages products, pricing, product aliases and staff logins. Staff only see the stock-update screen and cannot edit prices or product details.

3 Pricing

SETUP INCLUDED

Flat · per quarter

₹25,000

- ✓ Everything under “What’s included”
- ✓ QR stickers generated for up to 100 products
- ✓ Hosting and running costs, bug fixes, small tweaks, support
- ✓ No per-user or per-device charges
- ✓ Minimum 2 quarters, then it continues until you cancel. No GST charged currently

Vendor actuals (QR sticker printing and delivery, reprints, sets beyond the first 100 products) are billed at cost, with no markup.

4 What’s included

- QR stickers generated for up to 100 products
- Secure login for the owner and all staff
- Owner dashboard: products, pricing and product aliases
- Staff view: quick scan-based stock add/remove, nothing else editable
- In-page continuous scanning for fast, multi-item updates
- Full activity log by user, time and quantity
- Hosted securely on your own subdomain (for example admin.yourshop.com)
- Works in any smartphone or computer browser, no app installation

5 Not included

- Barcode scanner hardware or barcode-specific equipment
- Printing and delivery of QR stickers (vendor actuals, see below)
- Integration with Tally or any accounting software: stock is tracked independently, and reconciling with your accounts stays a manual process
- Customer-facing QR pages and public website stock sync (planned for a later phase, quoted separately)
- Offline use: an internet connection is needed to log a stock update
- Physical stocktaking or counting: this is software that records the counts you give it, and no manual labour is included

6 Planned for later

Natural next steps once the core system is live. Not part of the price above; scoped and quoted separately.

- Letting customers scan the same stickers to view the product on your public website (no sticker reprint needed)
- Keeping your website's product listings up to date with live stock and availability
- Connecting stock data with your accounting software

7 Data, timeline & payment

Your data stays yours

- Stock and sales records live in your own system
- Never sent to or visible inside Tally, Vyapar or any third-party software

Timeline & payment

- Typically about 3 weeks from kickoff
- 50% to begin, 50% on go-live
- Final quote confirmed after we understand your products and team

Stop counting stock by hand.

Message us on WhatsApp. Tell us roughly how many products and staff you have, and we'll reply with scope and a clear quote.
